EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1 (patent claim 1),

Line 1, "element" has been substituted with --member--;

Line 4, before "ratchet member", "the" has been substituted with --a--;

Line 5, after "push", "the" has been substituted with --a--;

Line 6, before "bottom ratchet member", "the" has been substituted with --

a--;

Line 9, before "engaging ring", "the" has been substituted with --a--;

Line 10, before "recessed ring", "the" has been substituted with --a--;

Line 14, before "hollow slot", "the" has been substituted with --a--;

Line 28, before "soft sponge", "the" has been substituted with --a--.

2. The following is an examiner's statement of reasons for allowance: none of the prior art of record teaches an squeezed application device comprising a tubular body; a rotating seat connected thereto; a pushing rod; a bottom ratchet member with a spring; a positioning rod protruded outward from the bottom section of the rotating seat, wherein the cross section of the positioning rod is similar to a hollow slot of the pushing

Art Unit: 3751

rod such that the positioning rod is allowed to be inserted into the slot; a material outlet end plug mounted at the top end of the tubular body, the end plug having an outlet edge elastically engaged with a spherical shape valve plate so as to seal the entire outlet edge, the valve plate having a plurality of through holes forming into a passage for the squeezed material, the outer side is covered with a cap having net hole, through the net hole and the hollow interior, together with a sponge surface layer on the cap, the rotating seat will drive the pushing rod upward to squeeze out the cosmetic lotion/cream and in turn move the valve plate upward to squeeze the material, when the pressure is larger than the elasticity of the arch-face of the valve plate, the valve plate will be deformed and the squeezing operation is achieved.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huyen Le whose telephone number is 703-306-5504. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Huson can be reached on 703-308-2580. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
